Professional Summary

Computer Science undergraduate with hands-on experience building scalable data-driven applications using Python and cloud technologies (AWS). Strong focus on solving real-world problems through automation and efficient system design.

Education

B.Tech in Computer Science and Engineering, UPES, Dehradun, Uttarakhand CGPA: 7.25/10	Jul 2023 – Present
12th, CBSE, Devbhumi Public School, Srinagar Garhwal, Uttarakhand Percentage: 83.30%	Apr 2022 – Mar 2023
10th, CBSE, Devbhumi Public School, Srinagar Garhwal, Uttarakhand Percentage: 77.2%	Apr 2020 – Mar 2021

Technical Skills

- Programming/Scripting Languages:** Python, SQL, R, TypeScript, JavaScript
- Frameworks & Libraries:** React, FastAPI, Scikit-learn, LangChain, Pandas, NumPy, Streamlit, Flask, TanStack Query, Zustand
- Tools:** Git, GitHub, Power BI, Jupyter Notebook, PostgreSQL, Supabase, Vercel, Render, VS Code
- Others:** Firebase, AWS (EC2, S3, Lambda, IAM, ElasticBeanstalk, CodePipeline), Tailwind CSS, SQLAlchemy, JWT, Alembic

Internships

- Papaya Coders Pvt. Ltd. | Duration: 8 Weeks** Jun 2025 – Jul 2025
Skills Learnt: AWS
Responsibilities:
 - Managed and deployed cloud-based applications using AWS EC2, S3, and Lambda.
 - Worked with IAM, cloud monitoring tools, and basic automation workflows.

Projects

- SmartKhata — Voice-Driven Udhaar Management System | [GitHub](#) | [Live](#)** Jul 2025
Tech Stack: Python, Streamlit, Firebase, Google Speech API, LLM (LLaMA 3.1)
Description: Built a production-deployed system enabling voice-based transaction entry, real-time storage, and ledger analytics for small shopkeepers.
Contribution:
 - Engineered an **end-to-end pipeline** integrating **Speech-to-Text** and **LLM** extraction, using structured prompts and JSON schema validation to convert unstructured voice input into transactions.
 - Designed a real-time data flow with **Firebase** and **Streamlit**, reducing manual entry effort and enabling **sub-5 second** transaction recording.
- Jira-lite — Full-Stack Project Management Tool | [GitHub](#) | [Live](#)** Jun 2025
Tech Stack: React 19, TypeScript, FastAPI, Python 3.12, PostgreSQL, SQLAlchemy, JWT, Tailwind CSS v4, TanStack React Query, Zustand, Vercel, Render
Description: Built a production-deployed, full-stack SaaS project management application — a lean alternative to enterprise tools like Jira — with multi-tenant workspaces, Kanban boards, and a complete email notification pipeline.
Contribution:
 - Architected a **React 19 + FastAPI full-stack SaaS** with multi-tenant workspaces, **Role-Based Access Control** (Owner/Admin/Member), JWT + bcrypt-OTP dual-layer auth, and PostgreSQL on Supabase; deployed frontend on Vercel and backend on Render.
 - Implemented a **drag-and-drop Kanban board** (@dnd-kit) with **snapshot-based optimistic updates** (auto-rollback on API failure) and a custom SMTP email engine using an adapter pattern, enabling provider swaps with zero cascading code changes.

Certifications and Accomplishments

- HackerRank Python (Intermediate) Certification. Feb 2025
- Certification: **Microsoft Azure Machine Learning Fundamentals** – LinkedIn Learning Feb 2026
- Solved 100+ DSA problems on LeetCode
- Achieved **LeetCode 50 Active Days Badge** through consistent algorithm and DSA practice.
